

# TECHNO AEROSPACE

## AUTHENTIQUE®

**A** unique finish which incorporates the use of various techniques. The finish may include, but not be limited to, custom designed film printing, paints, metals and additives. We are able to produce a clean finish along a tight radius and a sloping curve without a problem. Authentique® incorporates the same materials used on Business and VIP aircraft cabinetry. Cabinet grade top coat is always applied. Our in-house process allows us to accommodate large or small projects. Any rigid substrate that fits within the aircraft, can have Authentique® applied to it. Additionally, we also offer engineering and manufacturing services in order to provide a finished product, ready for installation. Our vast experience in the Industry enables Techno Aerospace® to provide Authentique® with an extremely high level of quality, reliability, depth of finish and clarity not commonly found in the industry. Heat release and smoke compliant configurations available.

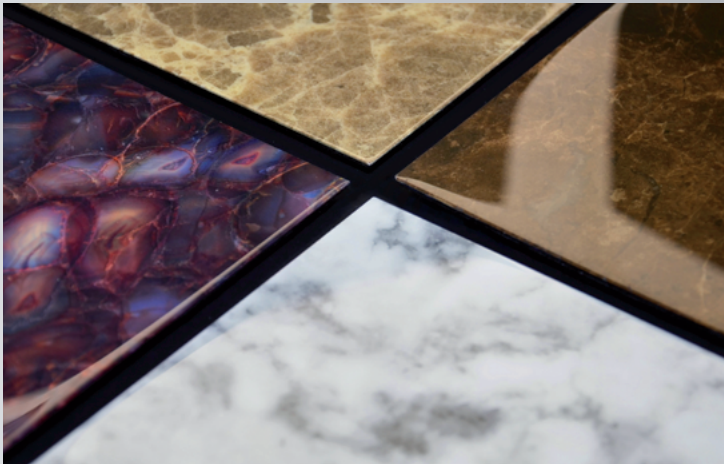

# TECHNO AEROSPACE

## AUTHENTIQUE®

### FEATURES & BENEFITS

- Lightweight finish
- Applies to any substrate shape
- Able to create custom patterns upon request
- A range of standard patterns available
- Large and small production runs without a minimum
- Standard and custom colors are available
- Can accommodate up to 18' lengths
- Robotic arm provides reproducible patterns
- Glossy, Silk, Satin Sheen and Leather Feel clear coats
- Custom sheens available upon request

### SPECIFICATIONS & TEST RESULTS

Vertical Burn FAR 25.853 (a)	Pass
Heat Release FAR 25.853 (d)	Pass
Corrosion Resistance	Pass
Adhesion ATSM D3359-08	Pass
Pencil Hardness ASTM D3363, 9H	Pass
UV Resistance ASTM D4587, 896h	Pass

### CARE & MAINTENANCE

- Clean with warm water and Windex only
- Always dry immediately with a soft, lint-free cloth
- Do not use aerosol-powered cleaners or polishes
- Do not use polishes containing waxes or abrasives
- Do not clean with alkaline, acetone or harsh cleaners
- Exposure to direct sunlight may modify the appearance
- Clear coat can be dented with extreme pen pressure
- Do not attempt to repair dented or scratched finish
- Contact Techno Aerospace® for repair instructions
