

# TECHNOAEROSPACE

## **GLASKOTE®**

**A**n extremely durable and elegant ceramic surface for a wide variety of applications that can be matched to nearly any desired color, faux finish or pattern. Suitable for both stainless and low carbon steel substrates, GLASKOTE® is an excellent finish for high wear surfaces and can conform to nearly any shape. Fixtures such as sinks, thresholds and flooring tiles can now have a finish that will last for years. The ceramic coating is impervious to water, highly resistant to abrasion and can endure extreme changes in temperature.

# TECHNO AEROSPACE

## GLASKOTE®

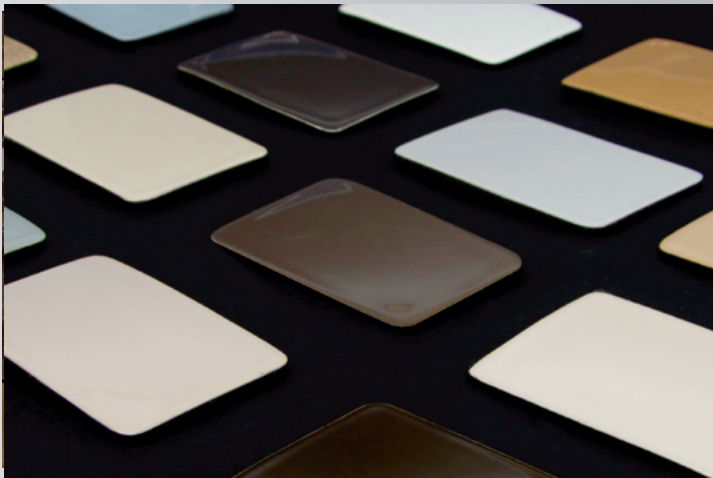

### FEATURES & BENEFITS

- Excellent durability for high wear surfaces
- Custom color matching and faux finishes available
- Glossy finish does not require a clear coat
- For use with stainless and low carbon steel substrates
- Applies to any geometry that fits within 4.5 cubic feet
- Larger surfaces accommodated with custom tile shapes
- Impervious to water

### SPECIFICATIONS & TEST RESULTS

Vertical Burn FAR 25.853 (a)	Pass
Toxic Gas Emissions	Pass
Hardness Resistance ISO 1518-1, 7.5 N	Pass
Abrasion Resistance 100K cycles per mil	Pass
Thermal Shock	Pass
Impact Resistance ISO 6272-1 up to 5 inch pounds	Pass

### CARE & MAINTENANCE

- Clean regularly with a non-abrasive alkali cleaner
- Rinse with lukewarm water
- Dry with a soft, lint-free cloth
- Avoid impact to ceramic surface with hard metal
- To prevent cracking, do not bend or deform substrate
- Glaskote® coating cannot be repaired if damaged
