

# TECHNO AEROSPACE

## Styllos®

Customized by an artist's hand, Styllos® is created for each project to provide a unique and individual artistic surface. The combination of special techniques and the use of real metal results in one of a kind textured surfaces, designed to add interest to any interior. Styllos® can be applied to any substrate or geometry. Techno Aerospace® can also provide Styllos® 2D and 3D substrates ready for aircraft installation. Our Styllos® finish can range from bold 3D forms to subtle veneer highlights. With our proprietary technique, we can also create ornate inlays into surfaces that would otherwise require intricate machining and traditional cabinetry techniques.
